SOFTWARE QUALITY ENGINEERING

Assignment 4 - UI Testing Execution Report

System Under Test: 3D-DET Platform (CMS + Unity 3D)

Section	BSE 6A
Testing Type	UI Testing
Assigned User Stories	US-01 to US-09: CMS hierarchy, rooms/tables, jobs, tasks, and tree view
Primary Functional Scope	Company, Building, Floor, Room, Table, Job Assignment, Process/Task, Task-Job Linking, Hierarchical View
CMS URL	https://crystalsystemcms-production.up.railway.app
Unity 3D URL	https://crystalsystem-3dapp-production.up.railway.app
Prepared By	AMIR &WALEED 01-131232-011,093
Date	5/16/2026

Jira →https://ai-project-2026.atlassian.net/jira/software/projects/SQE/boards/34?atlOrigin=eyJpIjoiOTkxZjQ4ZDY2ZDdlNGUzZWEzMzM2Y2I3OGYyNTg0ZmQiLCJwIjoiaiJ9

Note→ SS are added for each test case and its steps on Jira .

1. Introduction

This report documents Assignment 4 execution for UI testing of the 3D-DET Platform. The platform includes a CMS backend for managing organizational hierarchy and a Unity 3D frontend intended to visualize hierarchy and job/table assignments. The UI testing scope focused on verifying that required screens, forms, buttons, dropdowns, lists, validation messages, and hierarchy views behave as expected.

The tested CMS areas include Companies, Buildings, Floors, Rooms, Jobs, Tasks, Process Management, Task-Job Linking, and Hierarchical View. The test execution was performed manually through the CMS user interface and recorded in Jira AIO Tests.

Out of scope for this report: backend API internals, database verification, security testing, performance/load testing, and source-code level testing. Unity 3D was checked from a UI availability and data-loading perspective. The Unity frontend opened successfully, but building data could not be loaded because the system displayed a repeated "FAILED TO RECEIVE THE BUILDING DATA!" popup.

2. Test Plan Summary

Item	Description
Testing Objective	Verify the UI behavior of the CMS modules against the assigned user story acceptance criteria.
Testing Technique	Manual black-box UI testing using user stories and acceptance criteria.
Test Management Tool	Jira AIO Tests
Evidence	Screenshots of CMS screens, failed cases, forms, hierarchy view, and Jira execution.
Browsers	Chrome used for main execution; Firefox/viewport checks included for compatibility test cases.
Entry Criteria	CMS application accessible; tester logged in; required modules visible in sidebar.
Exit Criteria	All planned test cases executed and marked Pass/Fail/Blocked; failed cases logged as bugs.
Suspension Criteria	Testing suspended for a test case if feature is missing, inaccessible, or environment prevents execution.

2.1 Test Cycles Defined

Cycle	Scope	Entry Criterion	Exit Criterion	Result
Cycle 1 - Smoke Test	Basic navigation and main CRUD access checks for dashboard, company, building, floor, room, and job modules.	Application deployed and login available.	Critical navigation paths accessible.	Completed. Core navigation was available.
Cycle 2 - Full UI Test	Execution of complete UI suite in Jira AIO Tests.	Smoke cycle completed.	All planned test cases executed with status recorded.	Completed. 90 total test cases executed.
Cycle 3 - Regression Test	Retest failed cases after bug fixes.	Developer/instructor provides fixed build.	Previously failed TCs pass after retest.	Pending. Bugs remain open; no fixed build was available during this execution.

3. Test Case Design Rationale

Test cases were derived directly from the user story acceptance criteria. Each acceptance criterion was converted into at least one positive UI scenario and one negative, validation, boundary, or compatibility scenario wherever applicable.

Technique	How it was Applied	Example
Equivalence Partitioning	Inputs were divided into valid and invalid classes.	Company Name valid value versus blank value; Floor Name valid value versus empty input.
Boundary Value Analysis	Field length and numeric constraints were checked at or near limits.	Company Code 2-10 characters; Company Name 3-50 characters; Building rows max 5; columns max 10.
Decision Table Testing	Required-field combinations were checked for save/validation behavior.	Create Building form with company selected/not selected, country selected/not selected, building name filled/empty.
State Transition Testing	State changes after user actions were verified.	Table/job assignment state: unassigned -> assigned -> replaced/unassigned; hierarchy node display after creation.
Compatibility/UI Testing	Layout and readability were checked across browser/viewport conditions.	Firefox and 1366x768 viewport checks for navigation, buttons, and tables.

4. Full Test Suite (Pass/Fail Table)

The Jira AIO suite contained 90 executed UI test cases. The table below summarizes the full test suite using TC ID, user story, scenario, status, and evidence reference. Full step details are maintained in Jira AIO and the original Assignment 3 test-case suite.

4.1 Full Execution Table

TC ID	US	Type	Acceptance Criterion / Scenario	Status	Evidence
TC-UI-US01-AC01-01	US-01	Positive UI	AC01: A 'Create Company' option is accessible from the CMS dashboard or navigation	PASS	SS_TC-UI-US01-AC01-01.png
TC-UI-US01-AC01-02	US-01	Compatibility/UI	AC01: A 'Create Company' option is accessible from the CMS dashboard or navigation	PASS	SS_TC-UI-US01-AC01-02.png
TC-UI-US01-AC02-01	US-01	Positive UI	AC02: The form includes at minimum: Company Name and any required fields	PASS	SS_TC-UI-US01-AC02-01.png
TC-UI-US01-AC02-02	US-01	Compatibility/UI	AC02: The form includes at minimum: Company Name and any required fields	PASS	SS_TC-UI-US01-AC02-02.png
TC-UI-US01-AC03-01	US-01	Positive UI	AC03: Submitting valid data creates the company and it appears in the company list	PASS	SS_TC-UI-US01-AC03-01.png
TC-UI-US01-AC03-02	US-01	Compatibility/UI	AC03: Submitting valid data creates the company and it appears in the company list	PASS	SS_TC-UI-US01-AC03-02.png
TC-UI-US01-AC04-01	US-01	Positive UI	AC04: Submitting with missing required fields shows a validation error	PASS	SS_TC-UI-US01-AC04-01.png
TC-UI-US01-AC04-02	US-01	Negative/UI Validation	AC04: Submitting with missing required fields shows a validation error	PASS	SS_TC-UI-US01-AC04-02.png
TC-UI-US01-AC05-01	US-01	Positive UI	AC05: The newly created company can be opened/viewed immediately after creation	PASS	SS_TC-UI-US01-AC05-01.png
TC-UI-US01-AC05-02	US-01	Compatibility/UI	AC05: The newly created company can be opened/viewed immediately after creation	PASS	SS_TC-UI-US01-AC05-02.png
TC-UI-US02-AC06-01	US-02	Positive UI	AC06: Admin can navigate into a Company and find an option to add a Building	PASS	SS_TC-UI-US02-AC06-01.png
TC-UI-US02-AC06-02	US-02	Compatibility/UI	AC06: Admin can navigate into a Company and find an option to add a Building	PASS	SS_TC-UI-US02-AC06-02.png
TC-UI-US02-AC07-01	US-02	Positive UI	AC07: Building form includes at minimum a Building Name	PASS	SS_TC-UI-US02-AC07-01.png
TC-UI-US02-AC07-02	US-02	Negative/UI Validation	AC07: Building form includes at minimum a Building Name	PASS	SS_TC-UI-US02-AC07-02.png
TC-UI-US02-AC08-01	US-02	Positive UI	AC08: Saved building appears under the correct Company in the hierarchy	FAIL	SS_TC-UI-US02-AC08-01.png
TC-UI-US02-AC08-02	US-02	Compatibility/UI	AC08: Saved building appears under the correct Company in the hierarchy	PASS	SS_TC-UI-US02-AC08-02.png
TC-UI-US02-AC09-01	US-02	Positive UI	AC09: A company can have more than one building	PASS	SS_TC-UI-US02-AC09-01.png
TC-UI-US02-AC09-02	US-02	Compatibility/UI	AC09: A company can have more than one building	PASS	SS_TC-UI-US02-AC09-02.png
TC-UI-US02-AC10-01	US-02	Positive UI	AC10: Entering duplicate or invalid data shows an appropriate error	PASS	SS_TC-UI-US02-AC10-01.png
TC-UI-US02-AC10-02	US-02	Negative/UI Validation	AC10: Entering duplicate or invalid data shows an appropriate error	PASS	SS_TC-UI-US02-AC10-02.png
TC-UI-US03-AC11-01	US-03	Positive UI	AC11: Admin can navigate into a Building and find an option to add a Floor	PASS	SS_TC-UI-US03-AC11-01.png
TC-UI-US03-AC11-02	US-03	Compatibility/UI	AC11: Admin can navigate into a Building and find an option to add a Floor	PASS	SS_TC-UI-US03-AC11-02.png
TC-UI-US03-AC12-01	US-03	Positive UI	AC12: Floor form includes at minimum a Floor Name or Number	PASS	SS_TC-UI-US03-AC12-01.png
TC-UI-US03-AC12-02	US-03	Compatibility/UI	AC12: Floor form includes at minimum a Floor Name or Number	PASS	SS_TC-UI-US03-AC12-02.png
TC-UI-US03-AC13-01	US-03	Positive UI	AC13: Saved floor appears under the correct Building	FAIL	SS_TC-UI-US03-AC13-01.png
TC-UI-US03-AC13-02	US-03	Compatibility/UI	AC13: Saved floor appears under the correct Building	PASS	SS_TC-UI-US03-AC13-02.png
TC-UI-US03-AC14-01	US-03	Positive UI	AC14: Multiple floors can be added to the same building	PASS	SS_TC-UI-US03-AC14-01.png
TC-UI-US03-AC14-02	US-03	Compatibility/UI	AC14: Multiple floors can be added to the same building	PASS	SS_TC-UI-US03-AC14-02.png
TC-UI-US03-AC15-01	US-03	Positive UI	AC15: Attempting to save an unnamed floor shows a validation error	PASS	SS_TC-UI-US03-AC15-01.png
TC-UI-US03-AC15-02	US-03	Negative/UI Validation	AC15: Attempting to save an unnamed floor shows a validation error	PASS	SS_TC-UI-US03-AC15-02.png
TC-UI-US04-AC16-01	US-04	Positive UI	AC16: Admin can add a Room to a Floor	PASS	SS_TC-UI-US04-AC16-01.png
TC-UI-US04-AC16-02	US-04	Negative/UI Validation	AC16: Admin can add a Room to a Floor	PASS	SS_TC-UI-US04-AC16-02.png
TC-UI-US04-AC17-01	US-04	Positive UI	AC17: Admin can add a Table within a Room	PASS	SS_TC-UI-US04-AC17-01.png
TC-UI-US04-AC17-02	US-04	Negative/UI Validation	AC17: Admin can add a Table within a Room	PASS	SS_TC-UI-US04-AC17-02.png
TC-UI-US04-AC18-01	US-04	Positive UI	AC18: Table is saved and appears under the correct Room > Floor > Building hierarchy	FAIL	SS_TC-UI-US04-AC18-01.png
TC-UI-US04-AC18-02	US-04	Compatibility/UI	AC18: Table is saved and appears under the correct Room > Floor > Building hierarchy	PASS	SS_TC-UI-US04-AC18-02.png
TC-UI-US04-AC19-01	US-04	Positive UI	AC19: Multiple tables can be placed in one room	PASS	SS_TC-UI-US04-AC19-01.png
TC-UI-US04-AC19-02	US-04	Compatibility/UI	AC19: Multiple tables can be placed in one room	PASS	SS_TC-UI-US04-AC19-02.png
TC-UI-US04-AC20-01	US-04	Positive UI	AC20: Room and Table names are editable after creation	PASS	SS_TC-UI-US04-AC20-01.png
TC-UI-US04-AC20-02	US-04	Compatibility/UI	AC20: Room and Table names are editable after creation	PASS	SS_TC-UI-US04-AC20-02.png
TC-UI-US05-AC21-01	US-05	Positive UI	AC21: Admin can assign an existing Job to a Table	PASS	SS_TC-UI-US05-AC21-01.png
TC-UI-US05-AC21-02	US-05	Negative/UI Validation	AC21: Admin can assign an existing Job to a Table	PASS	SS_TC-UI-US05-AC21-02.png
TC-UI-US05-AC22-01	US-05	Positive UI	AC22: The Job-Table assignment is saved and visible in the hierarchy	PASS	SS_TC-UI-US05-AC22-01.png
TC-UI-US05-AC22-02	US-05	Compatibility/UI	AC22: The Job-Table assignment is saved and visible in the hierarchy	PASS	SS_TC-UI-US05-AC22-02.png
TC-UI-US05-AC23-01	US-05	Positive UI	AC23: A table can have a job assigned and unassigned	PASS	SS_TC-UI-US05-AC23-01.png

5. Bug Log

The following defects were identified from failed Jira AIO execution and CMS GUI observations. Each bug should be created in Jira and linked to its failed test case.

Bug ID	Linked TC / Area	US	Summary	Severity	Status
BUG-001	US-02 / Building creation company selection	US-02	Created company is not visible in Building Creation company dropdown	High	Open
BUG-002	TC-UI-US03-AC03-02 / TC-UI-US03-AC13-01	US-03	Created floor does not appear under selected building	High	Open
BUG-003	TC-UI-US04-AC03-02 / TC-UI-US04-AC18-01	US-04	Hierarchy view does not display Room > Table hierarchy	High	Open
BUG-004	TC-UI-US05-AC05-02 / TC-UI-US05-AC24-01	US-05	Unity fails to receive building data from CMS during 3D visualization	High	Open
BUG-005	TC-UI-US07-AC05-01 / TC-UI-US07-AC35-01	US-07	Process cannot be saved without workflow tasks	Medium	Open
BUG-006	TC-UI-US08-AC02-01 and TC-UI-US08-AC02-02 / TC-UI-US08-AC36-01	US-08	Job cannot be selected or does not appear in Associated Jobs table	High	Open

BUG-001 - Created company is not visible in Building Creation company dropdown

Field	Details
Module	Building Management
Linked TC / User Story	US-02 / Building creation company selection (US-02)
Severity	High
Status	Open
Steps to Reproduce	1. Login to CMS. 2. Open Companies module. 3. Create company named bse-6a. 4. Open Building Management. 5. Click Create Building. 6. Open Company dropdown.
Expected Result	Newly created company bse-6a should appear in the Company dropdown.
Actual Result	Created company bse-6a is not visible/selectable in the Building Creation dropdown.
Evidence	SS_BUG_001_CompanyCreated.png; SS_BUG_001_BuildingDropdown.png

BUG-002 - Created floor does not appear under selected building

Field	Details
Module	Floor Management
Linked TC / User Story	TC-UI-US03-AC03-02 / TC-UI-US03-AC13-01 (US-03)
Severity	High
Status	Open
Steps to Reproduce	1. Open Floor Management. 2. Click Add/Create Floor. 3. Select company and building. 4. Enter valid Floor Code and Floor Name. 5. Save. 6. Check selected building/floor list.
Expected Result	Created floor should appear under the selected building.
Actual Result	Created floor does not appear under the selected building in the list/hierarchy.
Evidence	SS_TC-UI-US03-AC03-02.png

BUG-003 - Hierarchy view does not display Room > Table hierarchy

Field	Details
Module	Hierarchical View / Room-Table
Linked TC / User Story	TC-UI-US04-AC03-02 / TC-UI-US04-AC18-01 (US-04)
Severity	High
Status	Open
Steps to Reproduce	1. Create/open company hierarchy with building, floor, room, and table. 2. Open Hierarchical View. 3. Select/search the company. 4. Check hierarchy output.
Expected Result	Hierarchy should display Company > Building > Floor > Room > Table structure.
Actual Result	Hierarchy view does not display the Room > Table hierarchy for the selected company.
Evidence	SS_TC-UI-US04-AC03-02.png

BUG-004 - Unity fails to receive building data from CMS during 3D visualization

Field	Details
Module	Unity 3D Visualization
Linked TC / User Story	TC-UI-US05-AC05-02 / TC-UI-US05-AC24-01 (US-05)
Severity	High
Status	Open
Steps to Reproduce	1. Login to Unity 3D frontend. 2. Select Test Company 1 from the company dropdown. 3. Click Buildings from the Unity side menu. 4. Wait for Unity to load building data. 5. Observe the popup message displayed on the Unity screen.
Expected Result	Unity 3D visualization should successfully receive building data from CMS and display the selected company's building/floor structure so the table/job assignment can be verified in the 3D model.
Actual Result	Unity opens successfully, but a popup appears repeatedly with the message: "FAILED TO RECEIVE THE

	BUILDING DATA!". Because of this, building data and job/table assignment cannot be verified in Unity.
Evidence	SS_BUG_004_Unity_Failed_To_Receive_Building_Data.png

BUG-005 - Process cannot be saved without workflow tasks

Field	Details
Module	Process Management
Linked TC / User Story	TC-UI-US07-AC05-01 / TC-UI-US07-AC35-01 (US-07)
Severity	Medium
Status	Open
Steps to Reproduce	1. Open Process Management. 2. Create a process with valid name and description. 3. Do not add workflow tasks. 4. Click Save.
Expected Result	Process should be saved successfully even with zero tasks.
Actual Result	Process is not saved without workflow tasks.
Evidence	SS_TC-UI-US07-AC05-01.png

BUG-006 - Job cannot be selected or does not appear in Associated Jobs table

Field	Details
Module	Task-Job Linking
Linked TC / User Story	TC-UI-US08-AC02-01 and TC-UI-US08-AC02-02 / TC-UI-US08-AC36-01 (US-08)
Severity	High
Status	Open
Steps to Reproduce	1. Open an existing task. 2. Open Task Jobs/Associated Jobs tab. 3. Select a job. 4. Save or verify Associated Jobs table.
Expected Result	Selected job should be linkable and should appear in the Associated Jobs table.
Actual Result	Job cannot be selected properly or selected job does not appear in the Associated Jobs table.

6. Test Metrics & Statistics

Metric	Value / Formula
Total Test Cases	90
Passed	84
Failed	6
Blocked / Terminated	0
Pass Rate %	(84 / 90) x 100 = 93.33%
Defect Density	6 bugs / 90 test cases = 0.067 bugs per TC
Defects by Severity	Critical: 0, High: 5, Medium: 1, Low: 0
Defects by Module	Building: 1, Floor: 1, Hierarchy/Room-Table: 1, Unity 3D: 1, Process: 1, Task-Job Linking: 1
Open Bugs	6

7. Test Cycles Report

Cycle	Executed Scope	Result	Notes
Cycle 1 - Smoke	Dashboard, sidebar navigation, company/building/floor modules, basic forms.	Passed with observations	Core screens were accessible from the CMS UI.
Cycle 2 - Full UI Execution	90 UI test cases in Jira AIO across US-01 to US-09.	84 Pass, 6 Fail, 0 Blocked	Failed cases were documented as open bugs.
Cycle 3 - Regression	Retest failed cases after fixes.	Pending / Not completed	No fixed build was available. Bugs should be retested after developer fixes.

8. Delivery Estimate & Product Readiness

The product is not ready for release because there are open High severity bugs affecting company-building linking, floor association, hierarchy display, Unity 3D building data loading, and task-job linking. These are core workflows for the assigned CMS hierarchy and Unity verification scope.

Calculation Item	Value
Open bugs	6
Assumed average closure rate	2 bugs per day
Estimated remaining days	6 / 2 = 3 working days
Regression effort after fixes	1 additional day
Estimated readiness	Approximately 4 working days after development fixes are available

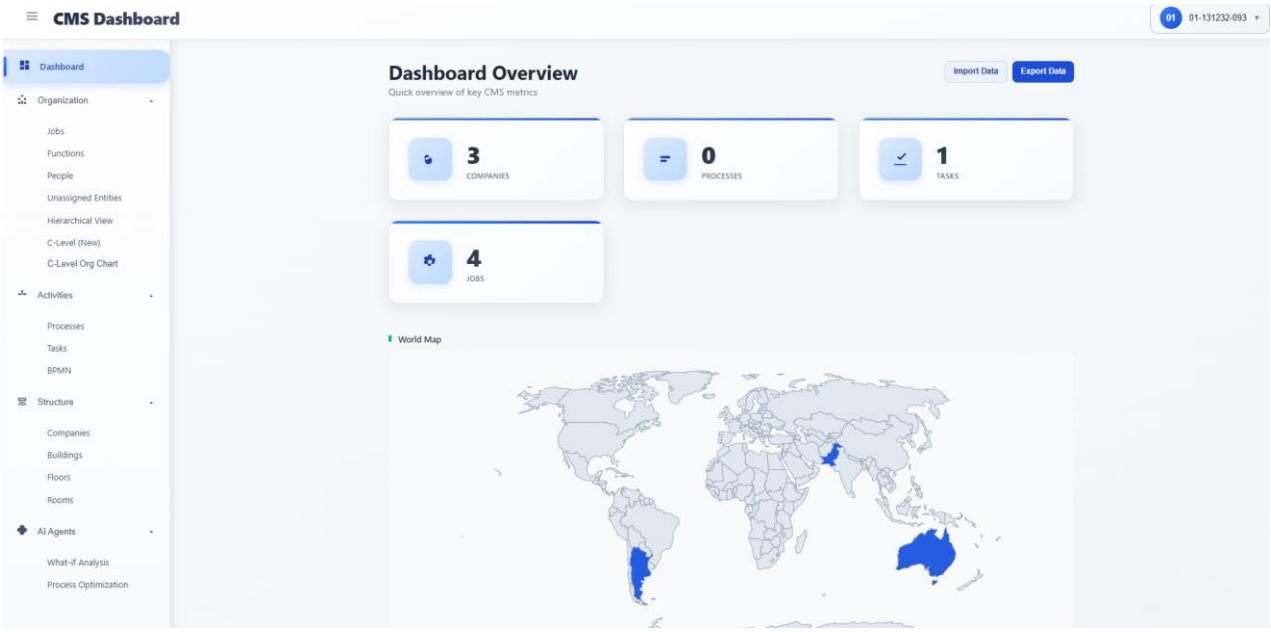

9. Go / No-Go Recommendation

Recommendation: NO-GO for production release.

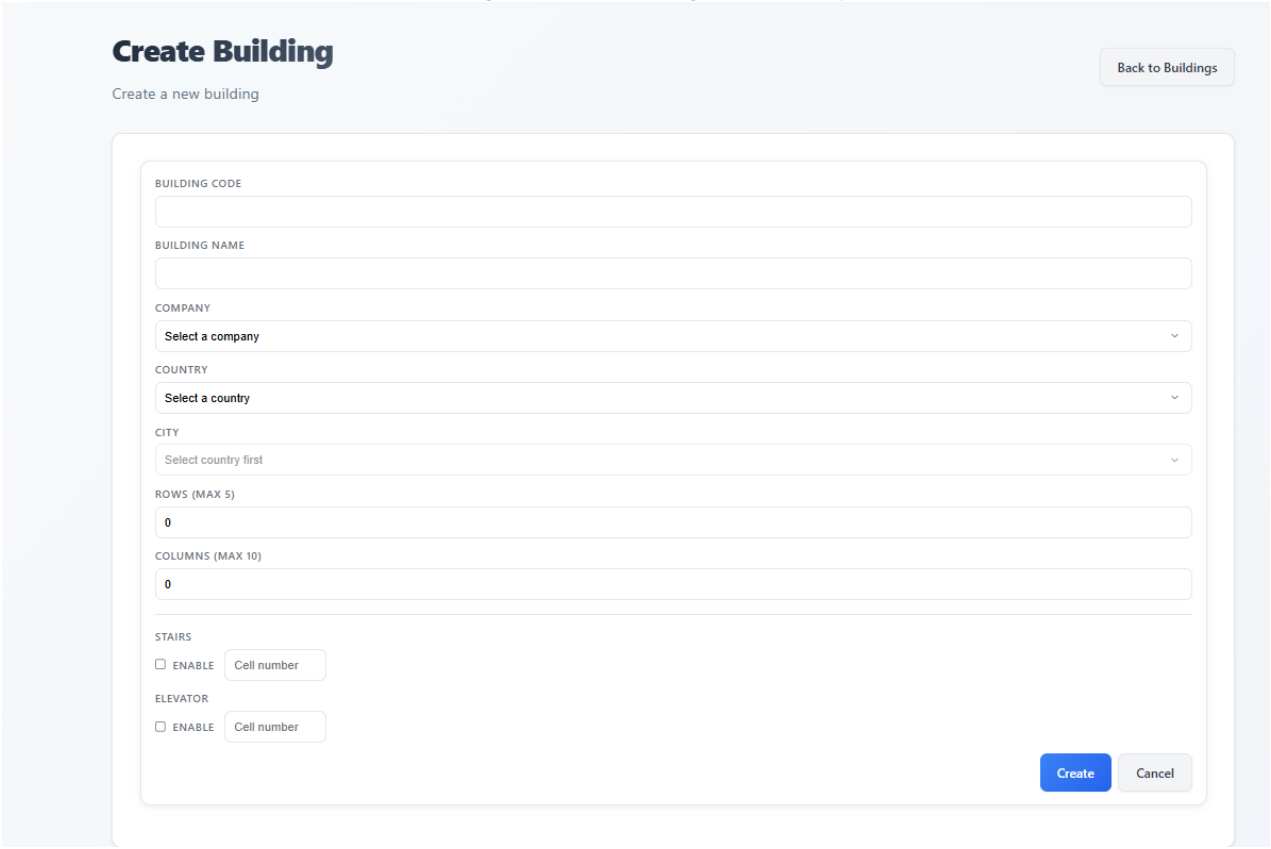

The overall pass rate is 93.33%, which is strong numerically; however, the failed cases include multiple High severity defects. The hierarchy view, floor association, building/company selection, Unity 3D building data loading, and task-job linking issues directly affect core business workflows. Therefore, the system should not be released until these defects are fixed and regression tested.
